Volume 5, no. 1, doi: [10.1128/mBio.00963-13](https://doi.org/10.1128/mBio.00963-13), 2014. In Results, in the paragraph headed “Mobile gene content differences” (PDF page 5), the third sentence should read as follows (revised text is in bold): “A fragment of *ISAbal* is located upstream of *bla*_{OXA-23}, whereas *aphA6* is flanked by *ISAbal*125 copies in the same orientation and inserted at the location where pACICU2 has a single *ISAbal*125 copy.”

Figure S1 has also been corrected to depict the correct location of *aphA6* and *bla*_{OXA-23}.
